

## High School Student Information and Online Educational Tools and Resources

Dear Parent/Guardian(s) of High School Students,

To provide our students with the most effective and engaging learning experiences possible, Spectrum High School utilizes web-based tools and applications hosted by third party providers, such as Google Apps for Education, Schoology, and similar educational programs. For a complete list of programs, including their privacy policy, see our school [website](#).

When students use these resources, certain personal identifying information is shared with the website provider to grant site access or personalize the learning experience. Generally, the student's name, grade, and school email address are collected for site access. The law permits school districts to consent to the collection of personal information on behalf of all of its students, thereby eliminating the need for individual website providers to obtain parental consent for each student.

If you wish to opt out your student from using third party websites for educational purposes only, please complete the form below. Note, this will mean that your child will not be able to collaborate and work online with other students and teachers. Your student and teacher will work together to determine appropriate accommodations to ensure your child meets the course outcomes.

-----

I have reviewed the list of programs and I do not want my student to use the online educational and collaborative tools necessary to complete coursework. I understand that alternative assignments will be assigned to my student to complete the course requirements.

**DO NOT complete this form if you allow your child to have access to the online digital tools and resources.**

Name of student: \_\_\_\_\_

Legal parent/guardian: \_\_\_\_\_

Date: \_\_\_\_\_

*Please return this sheet to the school main office.*
